

We strenuously object to the Consumer Bankers Association (CBA) trying to water down the telemarketing/ Telephone Privacy of Indiana. They are not trying to help consumers just make a buck. They would link every industry with a letter of relationship just so anyone could call at any time.

Do NOT allow business interest to invade our privacy against our wishes. They will hide the opt in in boiler plate someplace or send it in a bill or notice and then you will have it whether you want it or not.

There is not national opt out so our privacy would be non exstant.
